

Proxim Wireless Enables Resource Residential to Provide Free Wi-Fi(R) to 50 Apartment Communities Throughout the U.S.

SILICON VALLEY, CA, Aug 26, 2009 (MARKETWIRE via COMTEX News Network) -- Proxim Wireless Corporation (OTCQX: PRXM) (PINKSHEETS: PRXM), a leading provider of end-to-end broadband wireless systems that deliver the quadruple play, announced today that property management company Resource Residential selected Proxim's indoor and outdoor Wi-Fi(R) equipment to provide free Wi-Fi to all 50 of the apartment communities that they manage throughout the U.S.

"At Resource Residential, we place a large emphasis on delivering exemplary services to all residents of the communities that we manage," said Joel Anderson, Director of IT at Resource Residential. "As yet another service for our residents, we decided to offer free Wi-Fi to all residents and their guests in the common areas of all of our properties -- both indoor and outdoor -- and Proxim has enabled us to accomplish this with a balance between cost-effectiveness and high performance that we could not find elsewhere."

Once Resource Residential decided to provide free Wi-Fi throughout the common areas of all of their communities, which span 24 cities in 14 states throughout the country, they turned to Computer Solutions, Inc. (CSI) to recommend the best products for the network. CSI determined that Proxim's ORiNOCO(R) AP-4000MR/LR and AP-4000M access points enabled them to deliver a Wi-Fi network with greater performance than competing solutions at a fraction of the cost.

"When we looked at this project, we immediately knew that Proxim's solutions were the best fit," said Jack Hoffman, Owner of Computer Solutions, Inc. "Each location required both indoor and outdoor Wi-Fi coverage, and Proxim has unparalleled expertise in both. In addition, Proxim is able to provide a much better price/performance ratio than competing solutions, which helps Resource Residential continue to offer the service for free."

CSI worked with EduTech Systems, Inc. (EduTech), a network integrator and installer, to design and deploy the Wi-Fi networks throughout each location. Together, CSI and EduTech have deployed the Wi-Fi networks in all 50 locations, and EduTech provides ongoing technical support.

About Resource Residential

Resource Residential is a real estate property management company focused on providing the highest quality services to their residents. Resource Residential is based in Philadelphia and employs over 350 professionals. They manage apartment communities with an aggregate value of over \$1.7 billion.
